

## Using Discovery when off campus

We understand that learning at a distance can pose some unique challenges. Therefore, we offer a wide selection of online resources. The Discovery Service finds high quality books, respected academic journal articles, and more from the specialist databases from a single search. To get started, click the blue search button on the Library homepage, enter your search terms and click Search. You will then be asked for your Username and Password. Once you have entered these you will be given the results for your search. Your University login gives access to the Library's electronic resources, whether from the library's webpages, or Discovery.
