

Start your research with *reliable* sources

Trusted Content. Less Stress. Better Results.

Ebook Central was designed specifically for research, with input from busy students like you. Unlike many resources – including most information on the open web – all content in Ebook Central has been vetted with librarians for content you can trust.

Why is this important to you?

Trusted Content:

Easy simple and advanced search make finding answers quick and efficient - No need to navigate through numerous sites and broken links.

Less Stress:

Tools like bookshelves, highlighting, notes, downloads and mobile access make research easy.

Better Results:

Automatic, proper citations and 100% authoritative content make professors happy.

Millions of researchers around the world rely on
Ebook Central – You can too!

Getting Started with Ebook Central

1. Go to your library's website to **launch Ebook Central**.
2. **Choose among 10 different interface languages**.
3. **Conduct a simple or advanced search** that can be narrowed by publication year, relevance, subject, and other parameters. Search for exact phrases by putting them in quotations (e.g. "autism spectrum disorder").
4. Select the title to **enter a landing page** that provides key information about the ebook including a description, download availability, and copy and print allowances.
5. **Open the ebook and navigate** by scrolling or flipping through pages. Search for keywords within the ebook and jump to relevant chapters.
6. **Take notes, highlight text, and bookmark pages**, all of which are stored on your bookshelf.
7. **Create a proper citation** in your choice of format. Citations are automatically created when you copy and paste text and print pages and chapters to PDF.
8. **Manage research in your bookshelf** with folders and other tools. Share ebooks and folders with peers.
9. **Download ebooks or specific chapters** to use offline.
10. **Enjoy ebooks on-the-go** on any mobile device with the independent Bluefire Reader.

The screenshot displays the ProQuest Ebook Central interface. At the top, there is a search bar with the text "Search ebooks" and a search button. To the right of the search bar are links for "Advanced Search" and "Browse Subjects". The top right corner features the "UNIVERSITY LIBRARY" logo and a "Sign Out" button. The main content area is titled "Search" and shows "34 book results for nanomaterials". On the left side, there are filters for "YEAR PUBLISHED" (2014: 16, 2013: 18), "SUBJECT" (Engineering: 23, Medicine: 13, Science: 10, Engineering: Civil: 7, Engineering: Chemical: 5), "LANGUAGE" (English: 34), and "AUTHOR" (Tiwari, Ashutosh: 3, Cimmino, Sossio: 1, Chu, Paul K.: 1, Cho, Sang Hyun: 1, Cabrera, Carlos R.: 1). The search results are displayed in a list format, with each entry showing a book cover, the title, author, publisher, year, ISBN, and a brief description. The first result is "Nanomaterials" by Haghi, A. K.; Zachariah, Ajesh K.; and more, published by Apple Academic Press in 2013. The second result is "Bioengineered Nanomaterials" by Tiwari, Ashutosh, published by Taylor and Francis in 2013. The third result is "Carbon-based Nanomaterials and Hybrids" by Fecht, Hans J.; Brühne, Kai; Pan, Stanford, published in 2014. Each result includes a "Available" status indicator.
